

24 January 1972.

MEMORANDUM FOR THE RECORD

SUBJECT: Printing Services Building Addition

1. On this date (21 January 1972) a search was initiated for the purpose of determining the original structural design concept for proposed future vertical expansion of the Headquarters Printing Services Building.

2. In referring to the original working drawing set supplied [REDACTED] for the Printing Services Building, it was found that the column schedule (found on drawing 7-4 structural) for the original building indicates plans for an additional second and third floors. These two additional floors combined with the existing ground and first floor make for a total of four floors in the final design.
